Revision 16

Notes: (80 Byte X 48 Line)

Note1:

*The LED head and related parts of the machine equipped with a current LED head are exchanged for current parts.

The LED head and related parts of the machine equipped with a new LED head are exchanged for new parts.

*Because current PU-F/W recognizes the LED head of old and new automatically, the change of PU-F/W is unnecessary.

*When the one with new head and related parts and the old one exist together and are installed in the device, it becomes "LED Head Missing" display.

*Current and new LED head can be distinguished by the revision number of equipment.
